LOW BLOOD SUGAR EMERGENCY SUPPLIES

for
If is:
feeling too low to walk to the classroom to test his blood sugar: please give him, call office.
unable to drink a juice, but still conscious: put some cake gel in between his gums and cheek, call office.
unconcious: do NOT place anything in his mouth. Stay with him and have someone call 911.

This is a handy little card that you can print out, trim and glue together front to back. It will fit nicely in a sandwich-size baggie, and you can include whatever juices your child uses for low blood sugar, a cake gel, etc. Make a bag for each classroom your child will be in, including specials like art, PE, music, library.

Diabetes at a glance care for a child with diabetes
